Note: Both the MPLAB IDE 8.91 and XC8 are also available on the workshop Moodle server at: www.ucdistancetraining.org then select **Pre Workshop preparations or you can download it from www.ucdistancetraining.odu.edu**

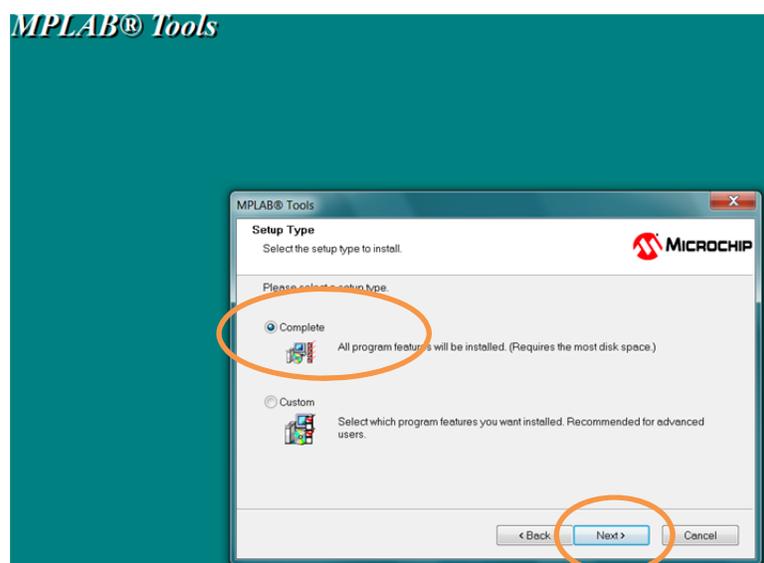

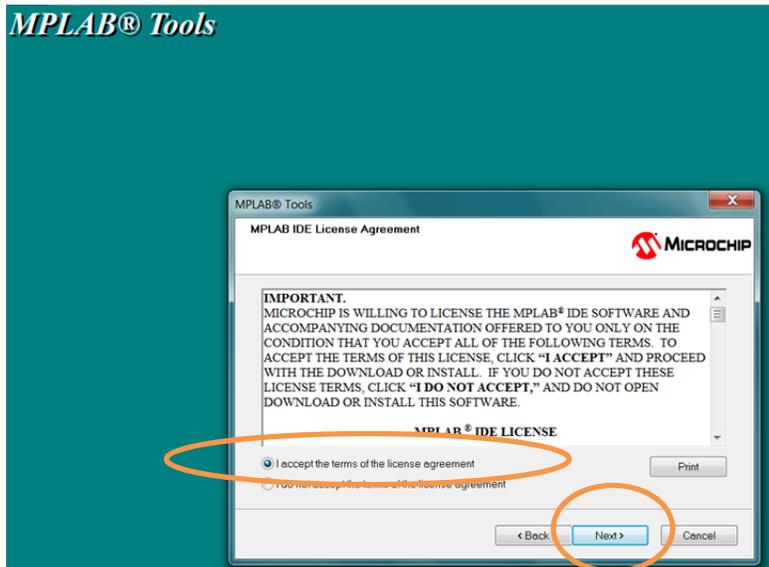

3. After you downloading the MPLAB IDE, double click the setup file to install the software.

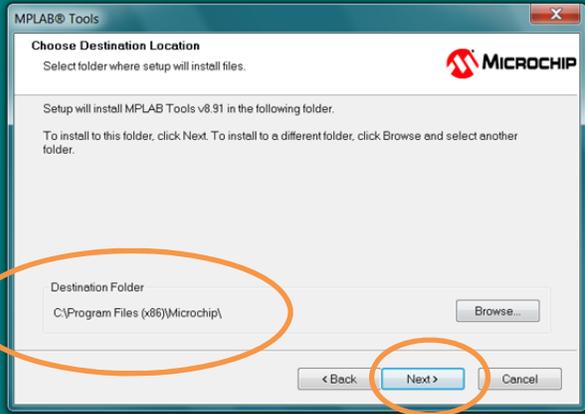

3. Follow the installation instruction and click Next.

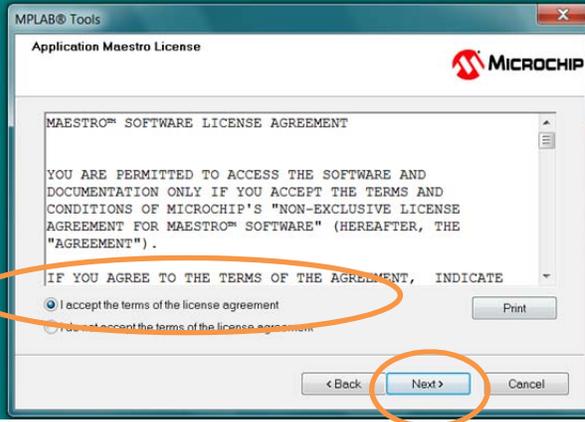

4. After selecting Next and then accepting the license agreement. Select Complete installation, the Next.....Next.

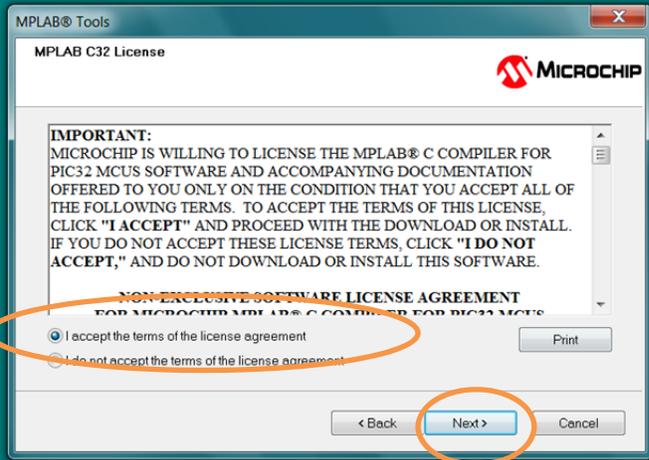

MPLAB® Tools

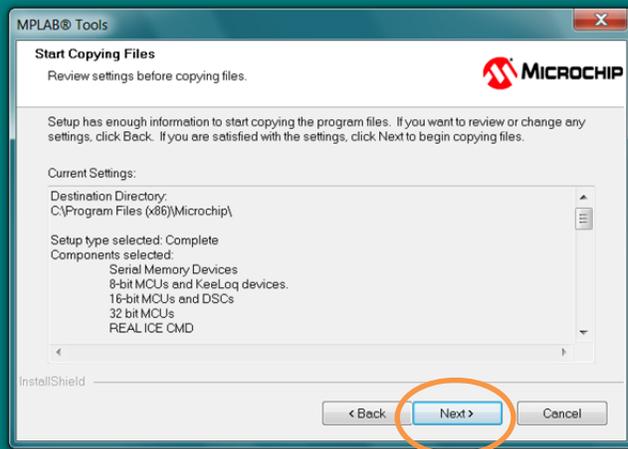

MPLAB® Tools

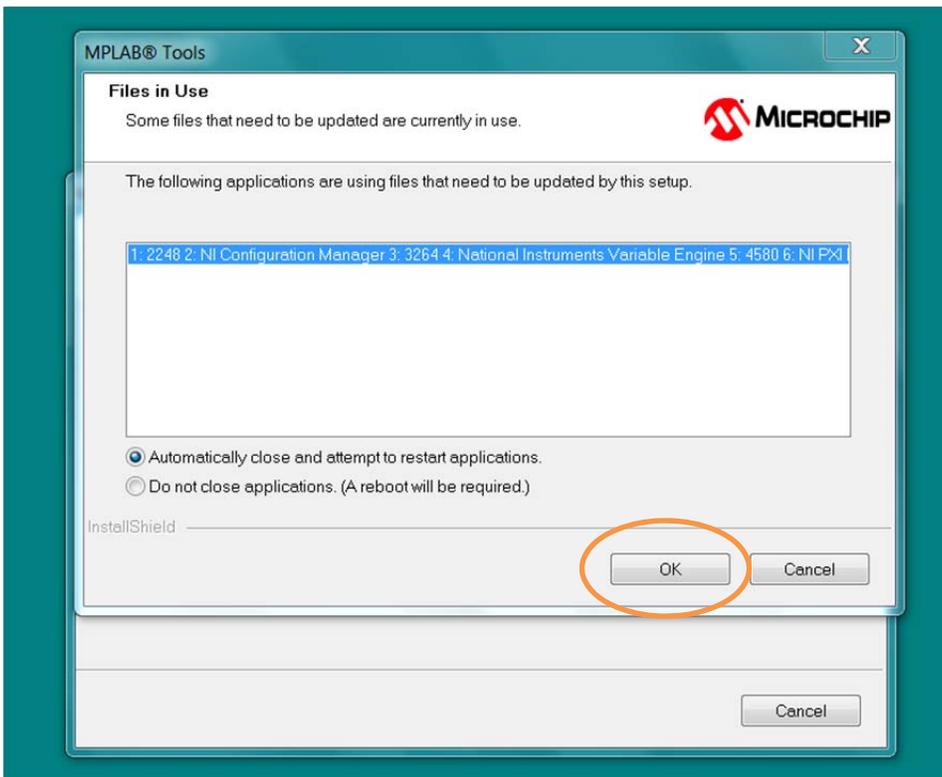

MPLAB® Tools

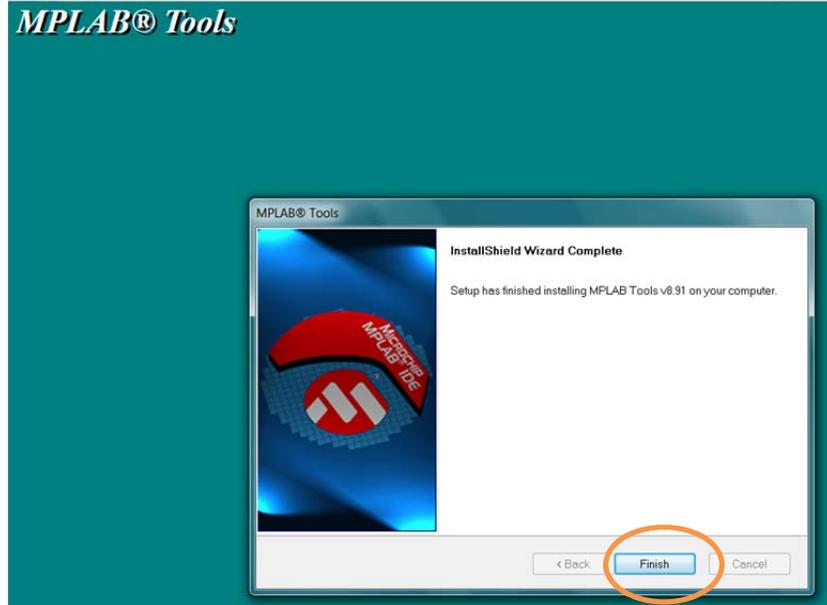

MPLAB® Tools

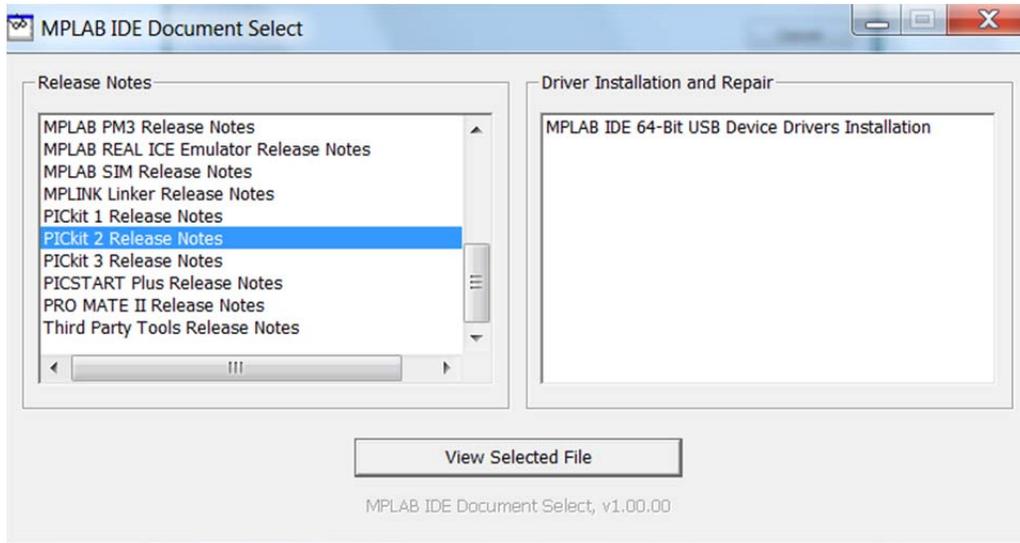

5. After selecting Next, Next.....Next the setup will lead to the following screen the software installation begins.....

6. It will take several minutes for the installation to complete and you will see this Window, then click Next again to complete the process:

7. If you want to view the release notes on the software, click and view, otherwise simple close the window and continue.....that will conclude the MPLAB IDE installation and you can verify it on your desktop window

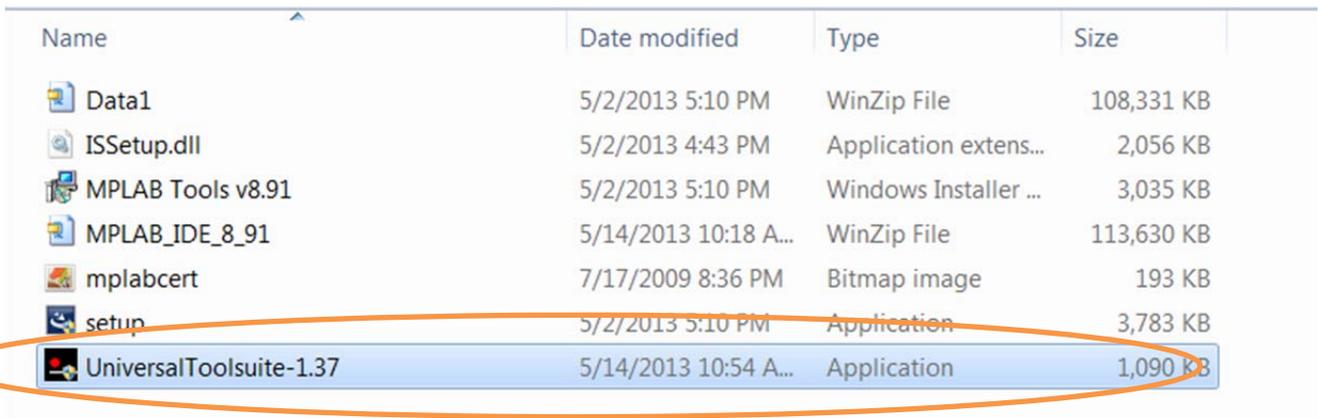

Install C Compiler

HI TECH Universal Toolsuite Ver 1.37 (PBLAB Plugin)

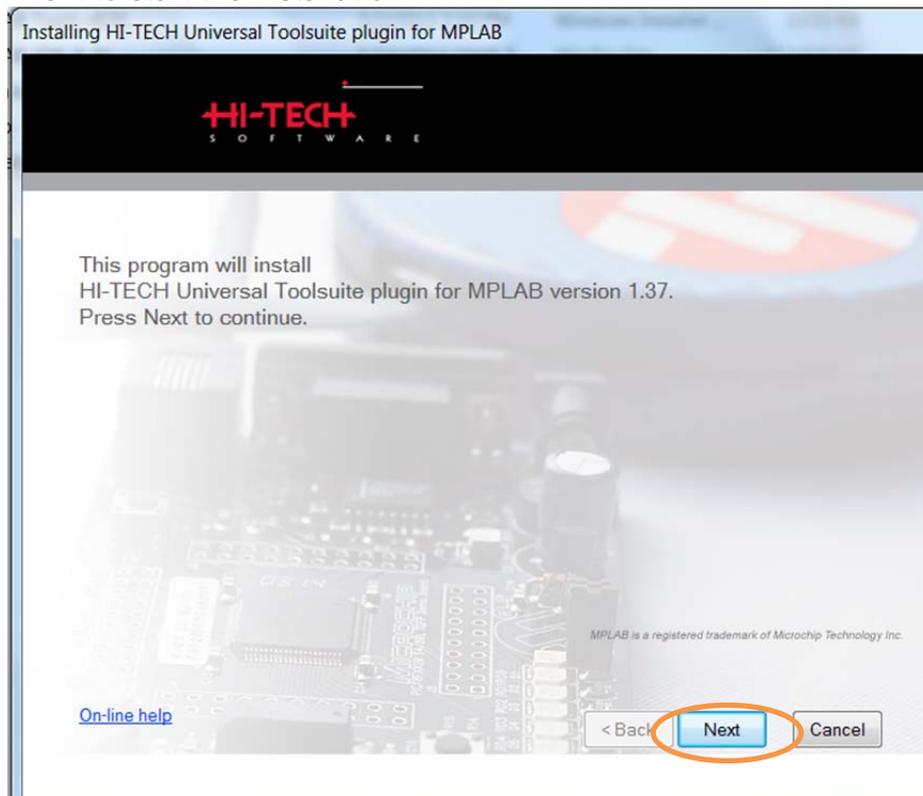

1. Download the HI TECH Universal Toolsuite from www.ucdistancetraining.org then select **Pre Workshop Preparations**

2. After downloading the software, double clicks on the UniversalToolsuite-1.37

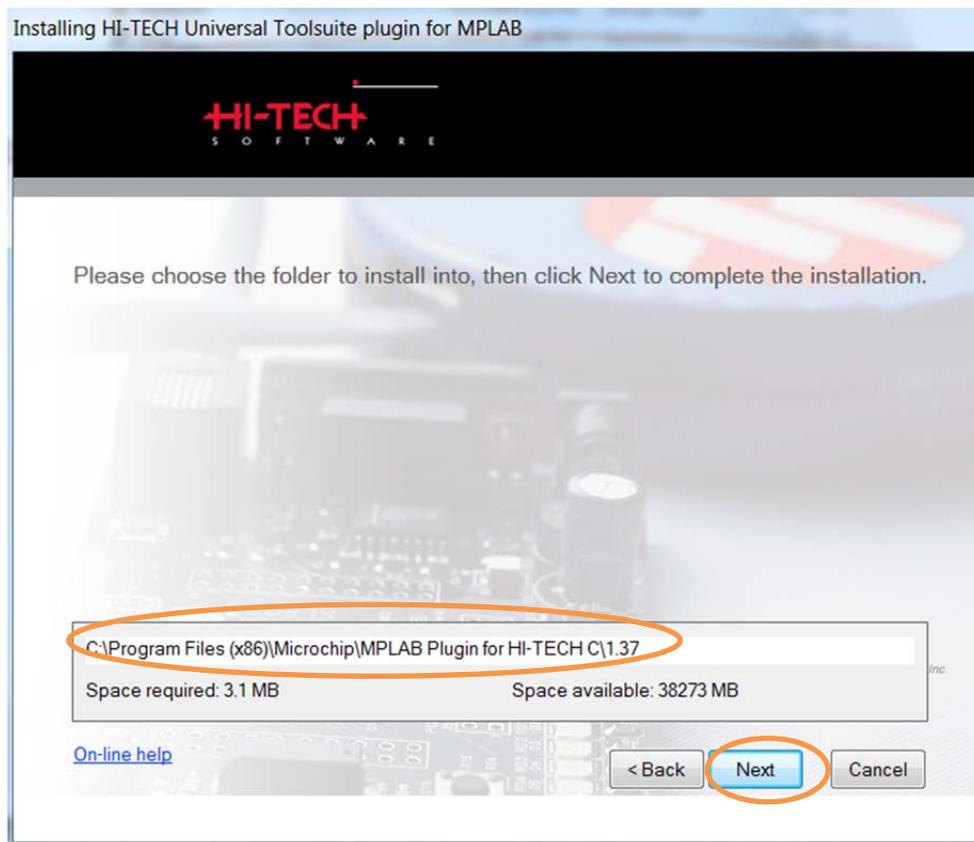

Name	Date modified	Type	Size
Data1	5/2/2013 5:10 PM	WinZip File	108,331 KB

setup	5/2/2013 5:10 PM	Application	3,783 KB
UniversalToolsuite-1.37	5/14/2013 10:54 A...	Application	1,090 KB

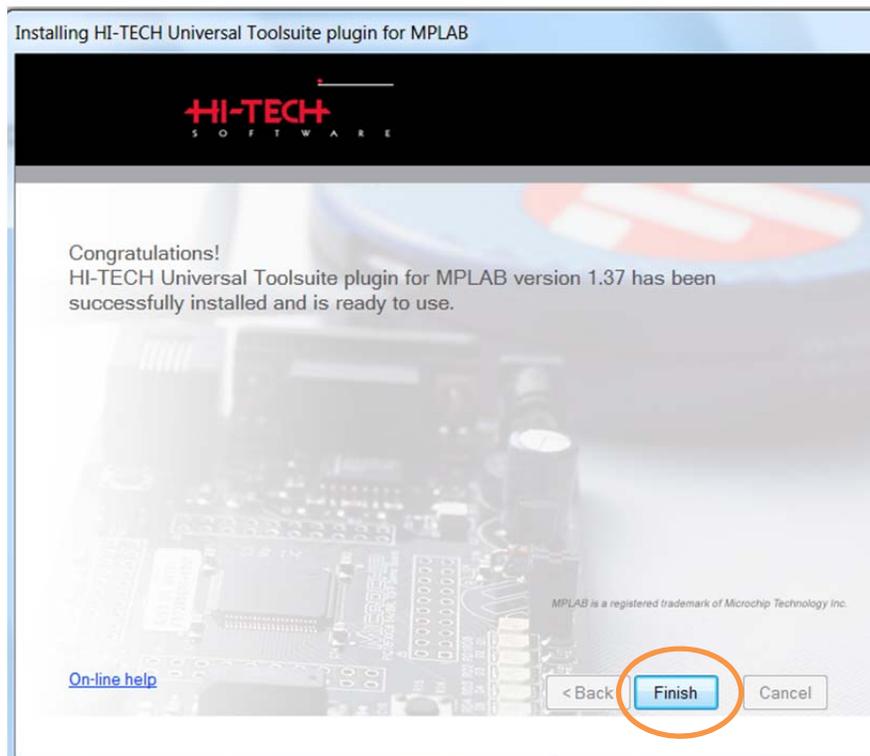

3. Click on Next to start the installation:

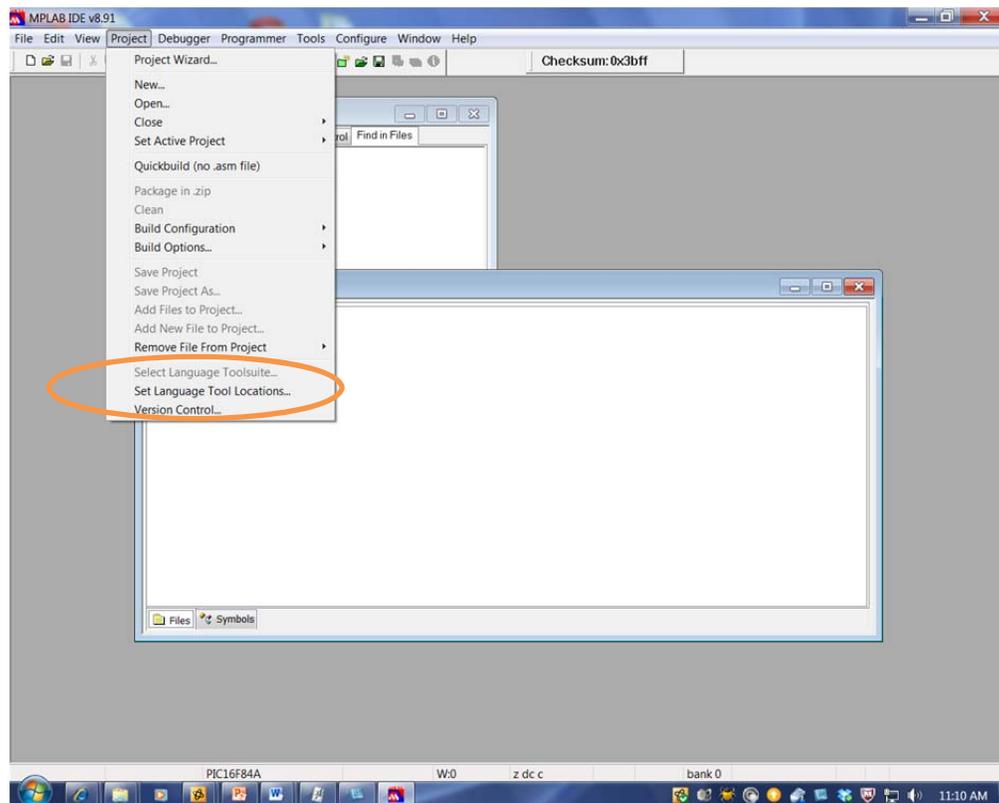

4. Check on the path of the software, then click on Next to install:

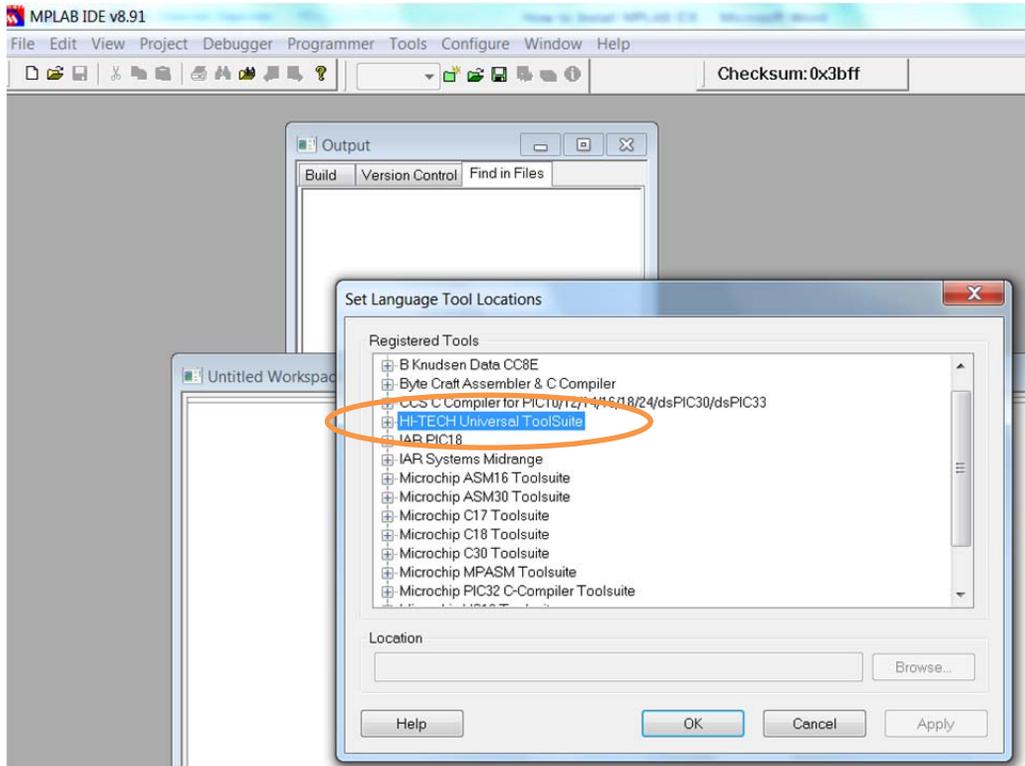

5. It only takes a few seconds to install and click on Finish to complete.

6. To check the C Compiler installation, Run MPLAB Ver. 8.91, under main menu, select Project, then click on “Set Language Tool Locations...”

7. If you can see the HI TECH Toolsuite as following that means the C Compiler is ready:

Install PIC BASIC Pro Compiler

From: microEngineering Labs

Note: If you are going to use BASIC compiler for this distance training workshop, please download this PIC BASIC Pro.

1. Go to <http://melabs.com/> to download the free trial version of the BASIC compiler:

2. Select the PBP3 without MPLAB option:

PICBASIC PRO™ Compiler 3.0 Downloads

[Download PBP 3.0.7](#) (126MB)
(Download includes MPLAB 8.90)

- This download will install PBP 3.0.x or update an existing install to the latest version.
- Updating will not affect activation status.
- If installed without an activation code (trial version), the software will be fully functional for 15 days.
- Activation can be completed off-line, without an Internet connection.
- Download includes PBP, MPLAB, MicroCode Studio, and MicroCode Studio Plus (product key required for MCSP)

[Download PBP 3.0.7
without MPLAB](#) (12MB)

**This install does not include MPLAB/MPASM.
MPLAB must be previously installed on your computer.**

- Same as larger download above, but does not include MPLAB. PBP requires that MPLAB or MPLABX be installed, but some users may already have it or prefer to download it directly from Microchip.
- Make sure that MPLAB supports the devices that you intend to use with PBP.
- Download includes PBP, MicroCode Studio, and MicroCode Studio Plus (product key required for MCSP)

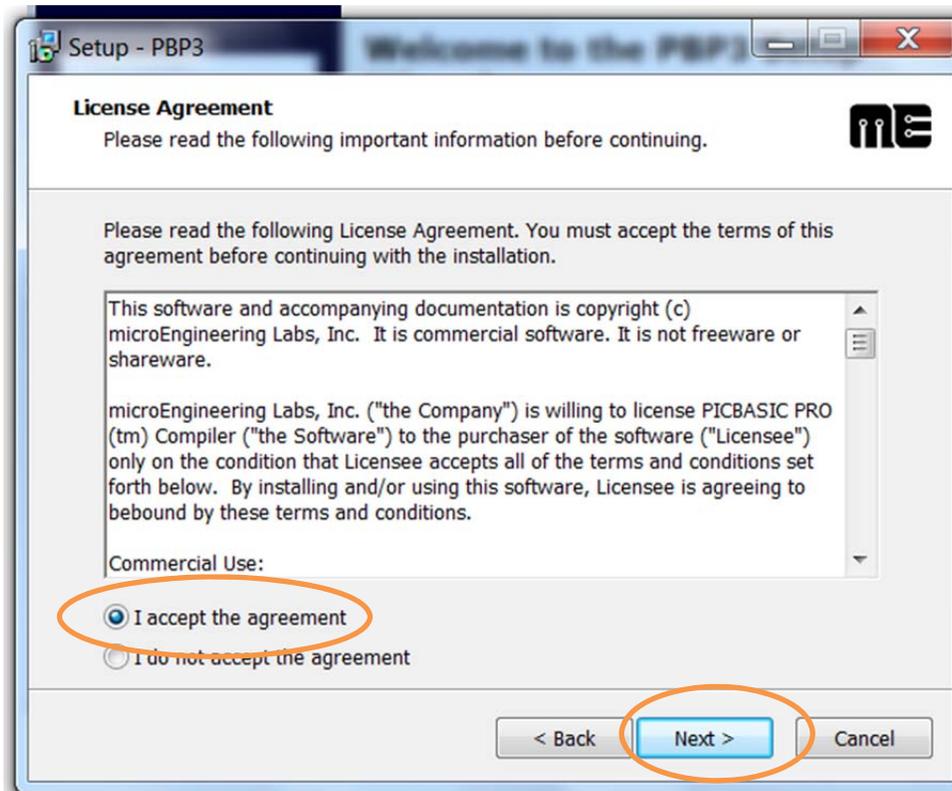

[Migration notes](#)

- Moving programs from PBP 2.x to PBP 3.0

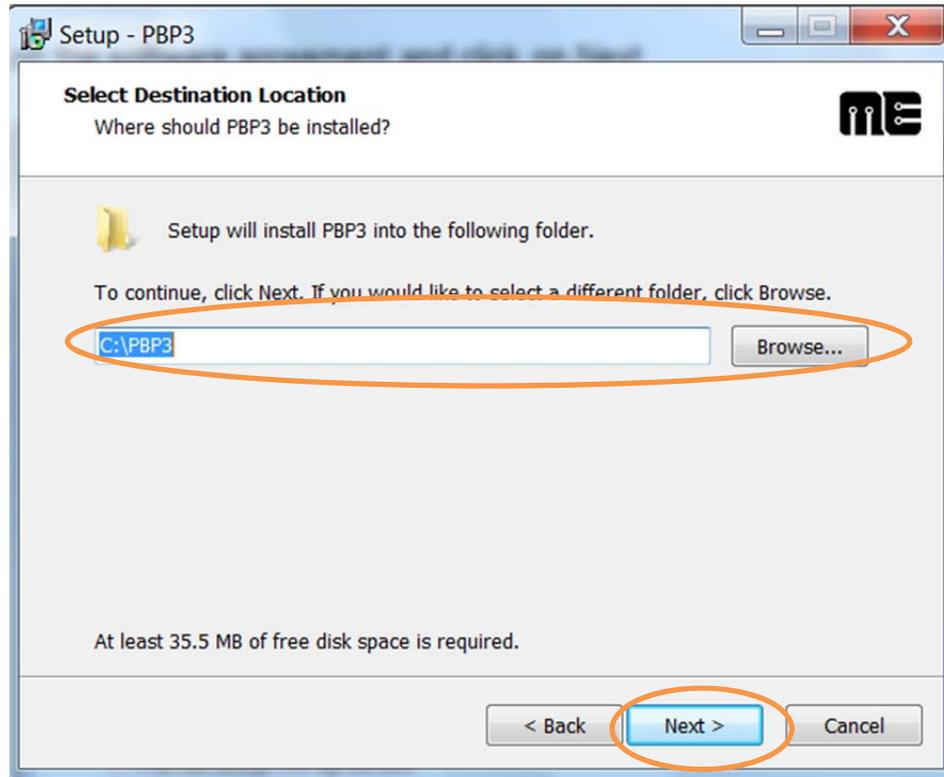

3. Click on Next to start the installation of the PIC BASIC Pro:

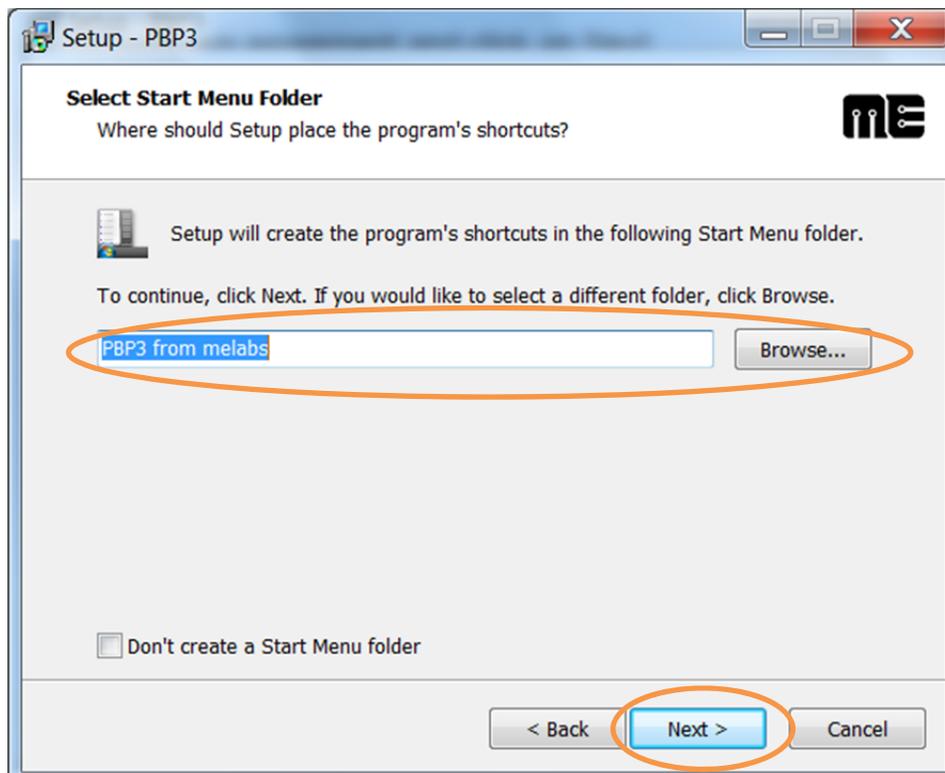

4. Select on the software agreement and Click on Next

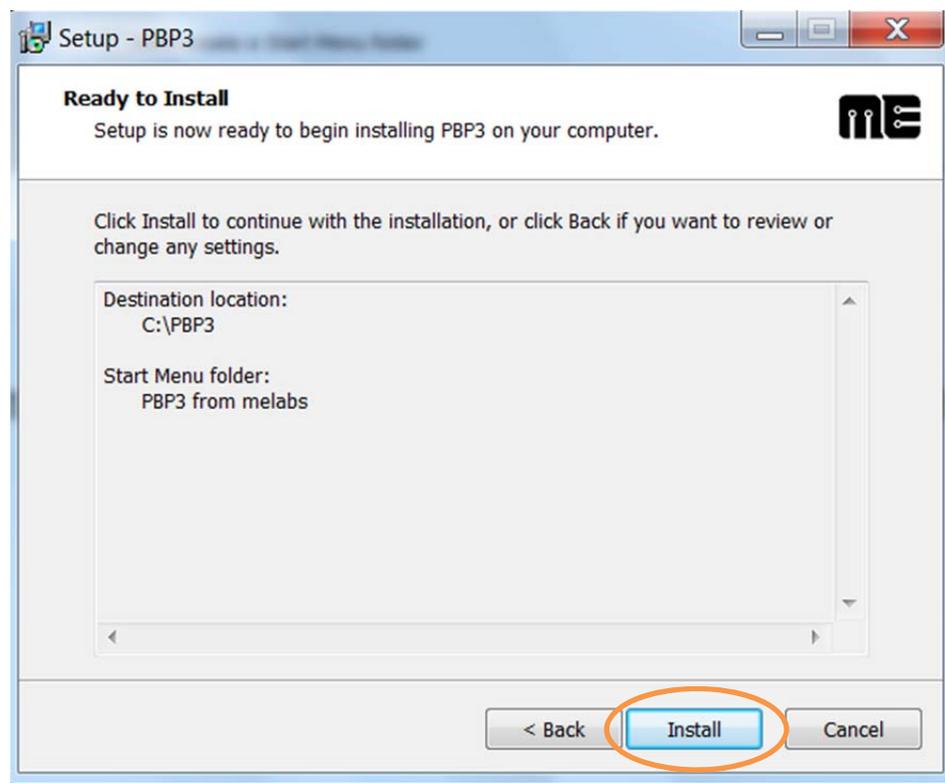

5. Check on the path on the software instalation, then Click on Next:

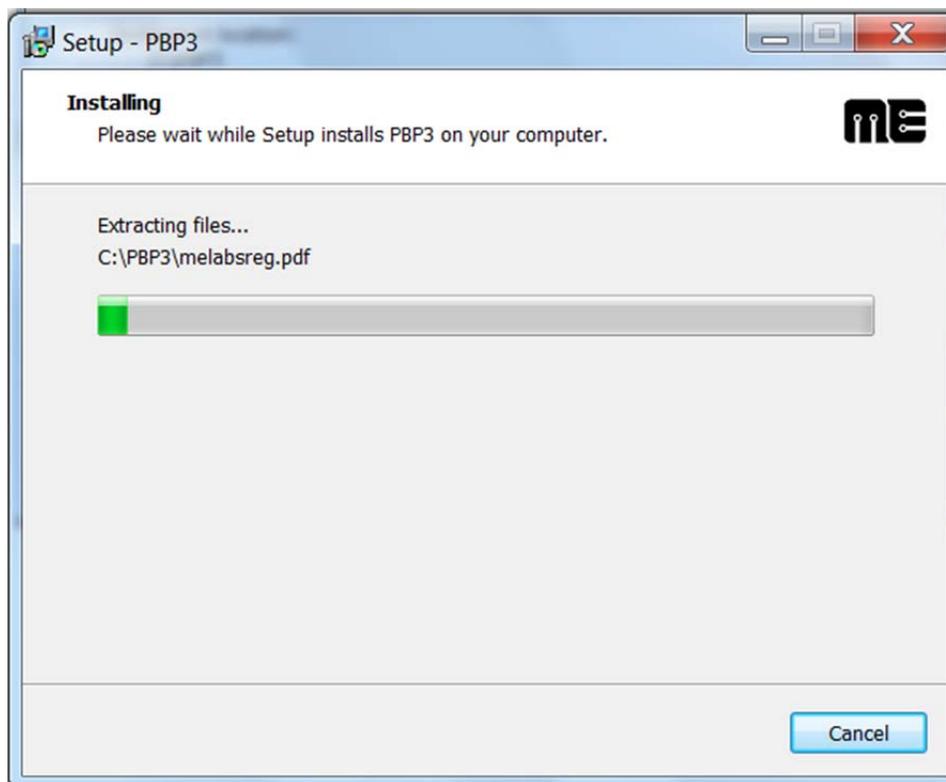

6. Choose PBP3 start from MPLAB, then Click Next:

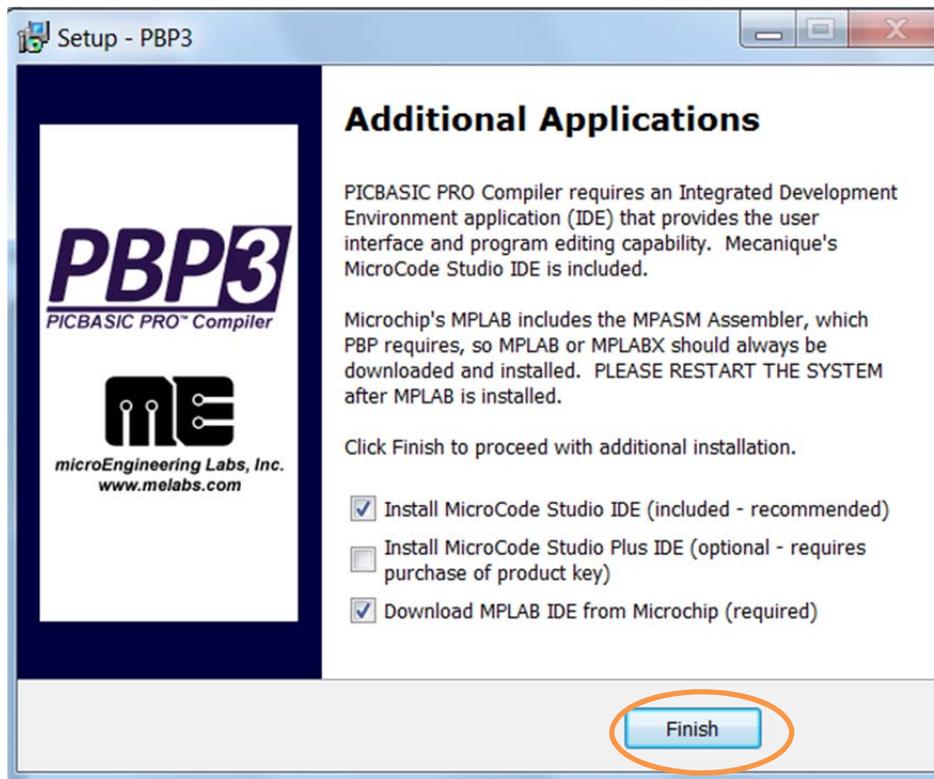

7. Click on the Install the software will begin its installation:

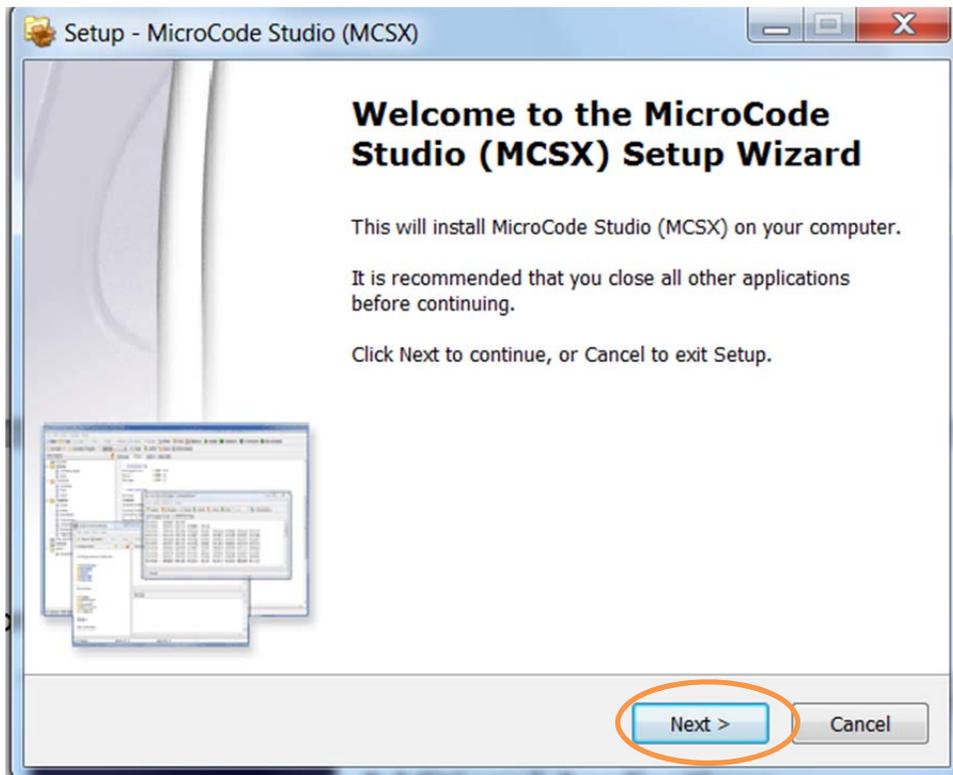

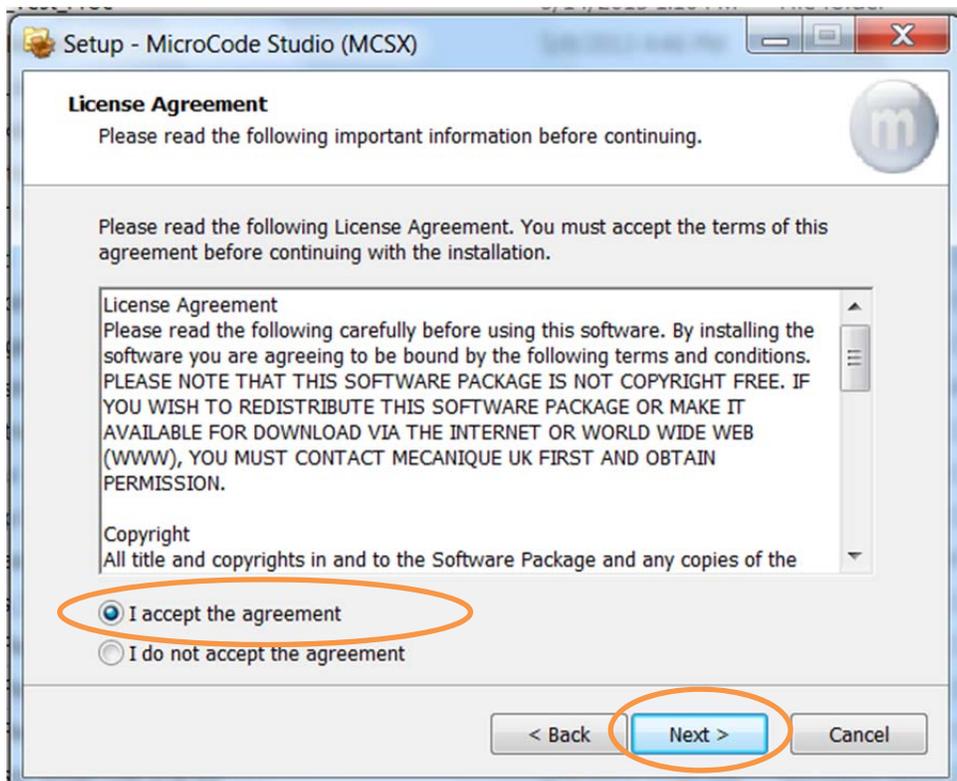

8. Click on the Finish to complete the PIC BASIC Pro installation:

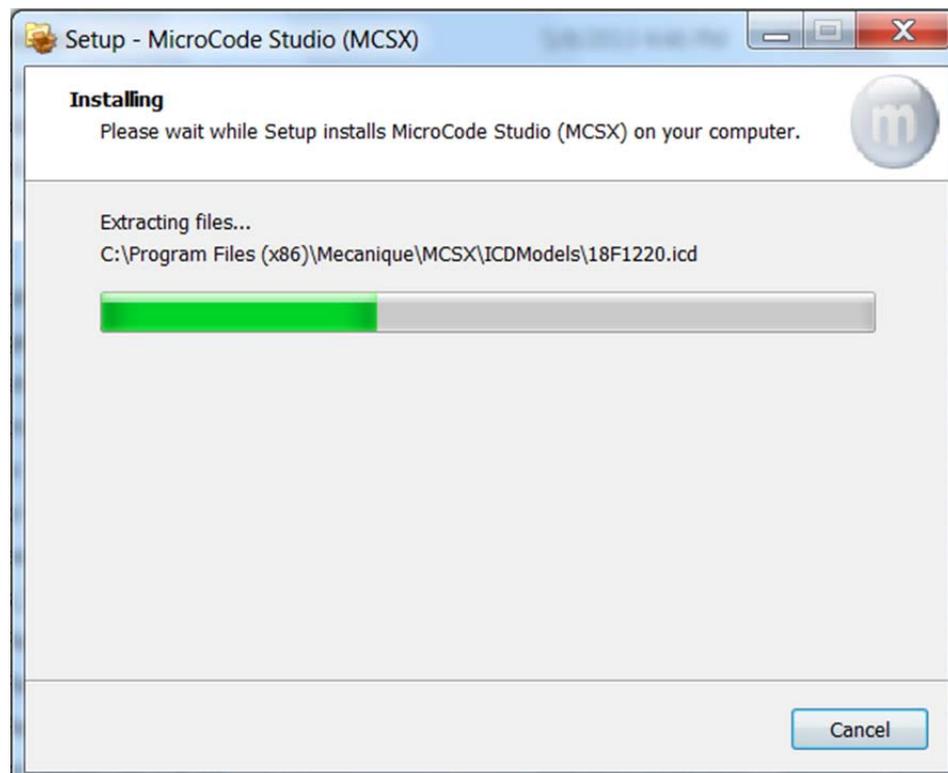

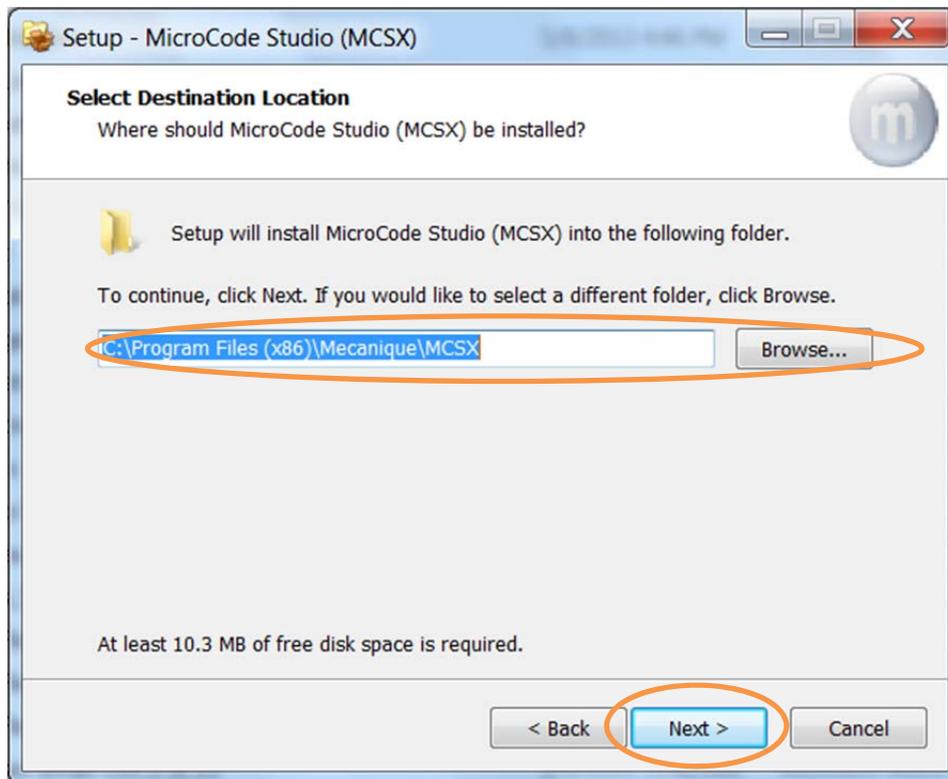

9. Click on Next to start the Micro Code Studio Setup Wizard:

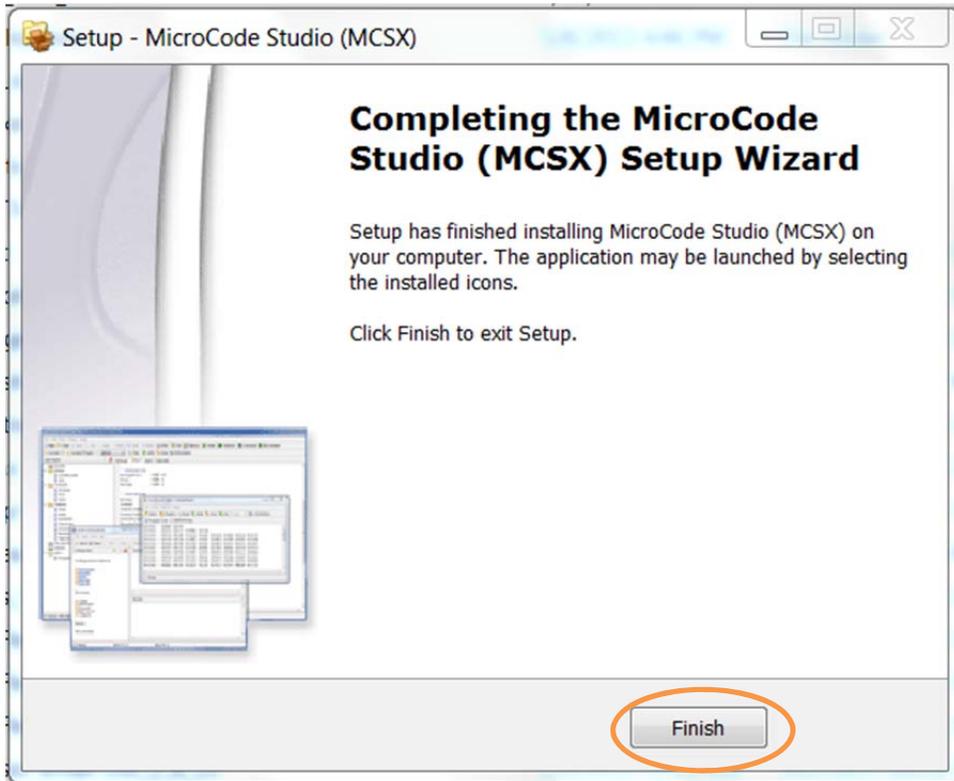

10. Select on the software agreement and Click on Next

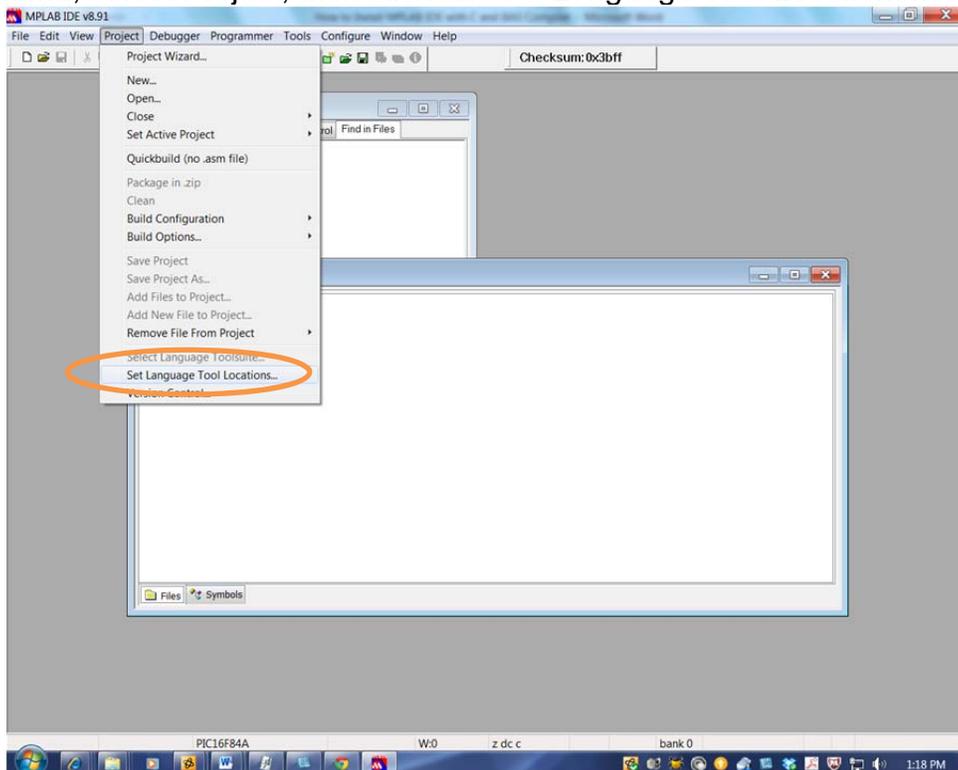

11. Check on the path on the software instalation, then Click on Next:

12. Click on the Finish to complete MicroCode Studio installation:

13. To check the PIC BASIC Pro Compiler installation, Run MPLAB Ver. 8.91, under main menu, select Project, then click on "Set Language Tool Locations..."

14. If you can see the HI TECH Toolsuite as following that means the PIC BASIC Pro Compiler is ready:
