

# How fix the dotnet frame work with PICKit2 communication issues?

1. Go to [www.ucdistancetraining.org](http://www.ucdistancetraining.org) to down load the PICKit2, ver 2.61 and install to your computer first

2. Run the PICKit2 software with your training system and.....:

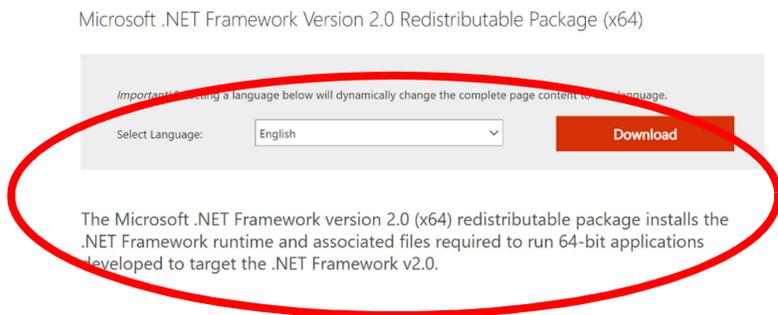

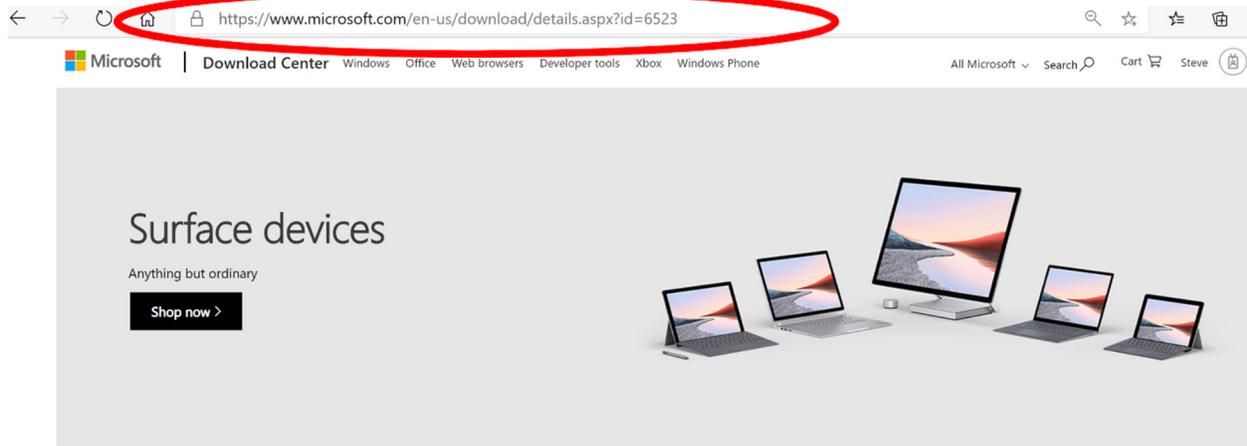

And you get this notice...

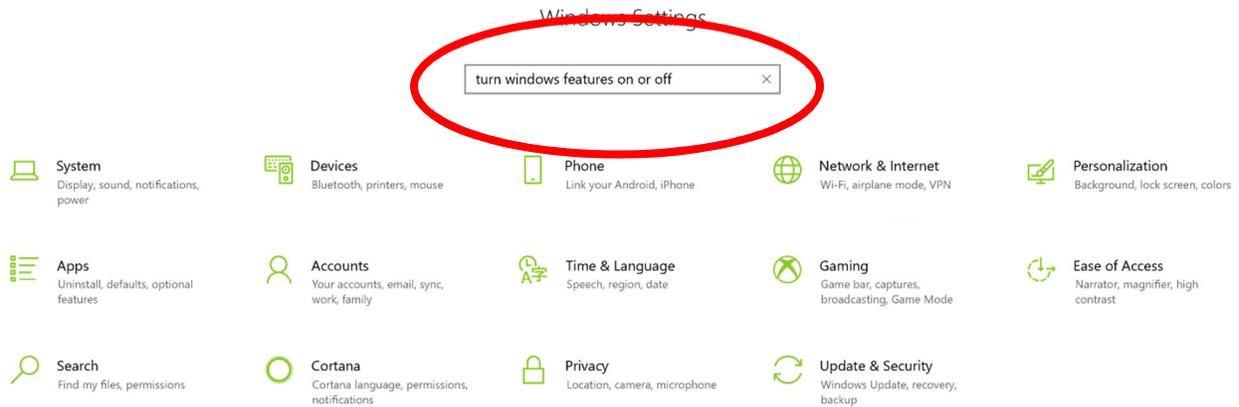

3. Go the following links to download the .NET Framework:

<https://www.microsoft.com/en-us/download/details.aspx?id=6523>

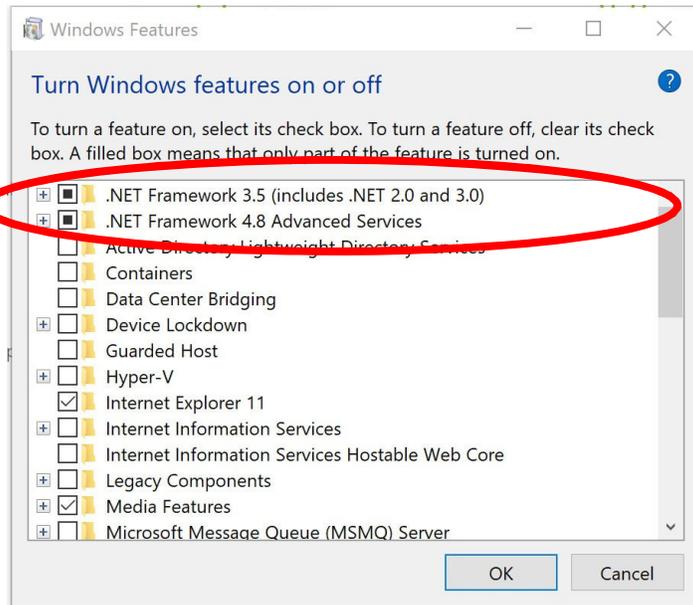

Or do the search for **net framework 2.0.50727 download windows 10**

4. Go to your computer control panel, choose/type Windows Settings, then type **turn windows feature on or off**

5. Next you will see the following window:

Make sure the **.NET boxes are checked.**

6. If the PICKit2 communications is still not established.

Go to Window, **Control Panel**, and **Device Manager**, Click on **Human Interface Devices**:

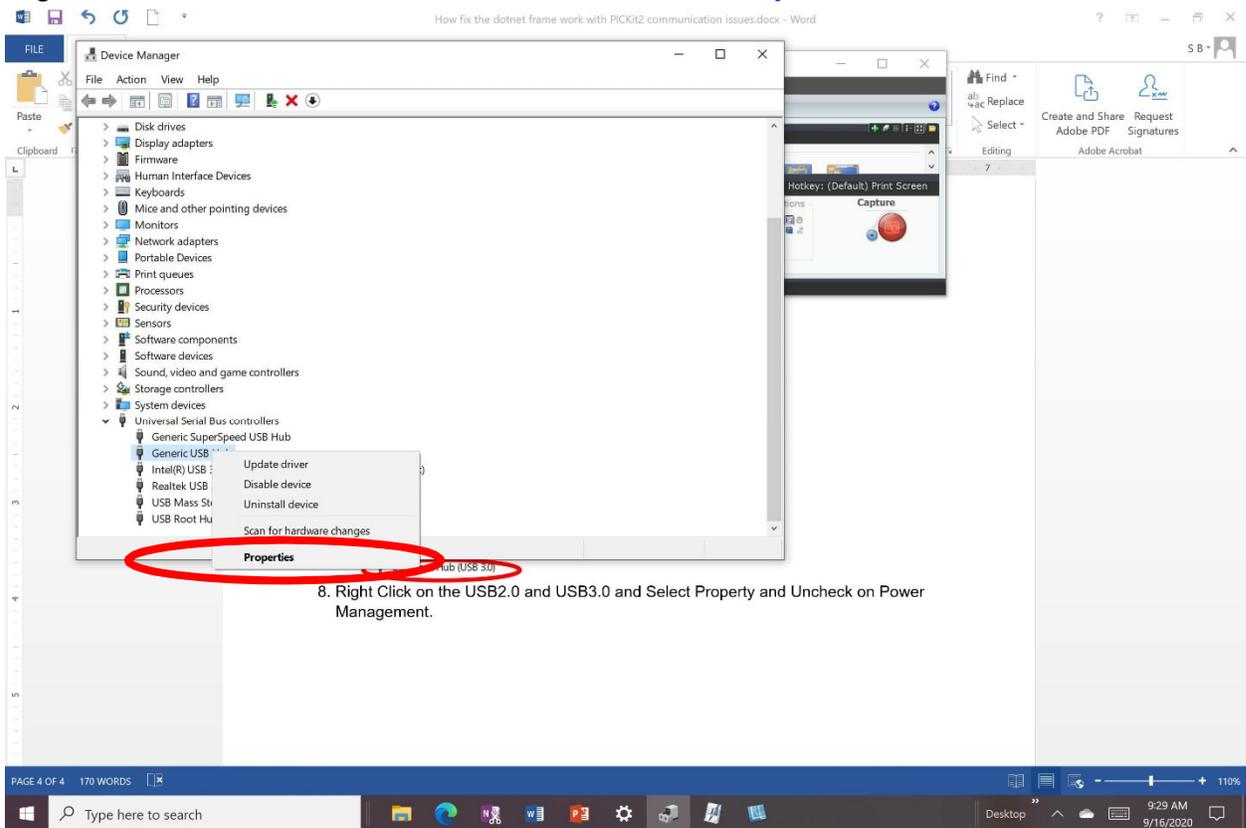

Uninstall any gray out device and make sure the **USB Input Device is migrated.** By click/select on the **USB Input Device is migrated** and Right Click on it.

7. Under the same **Device Manger**, Click the **Universal Serial Bus controllers**:

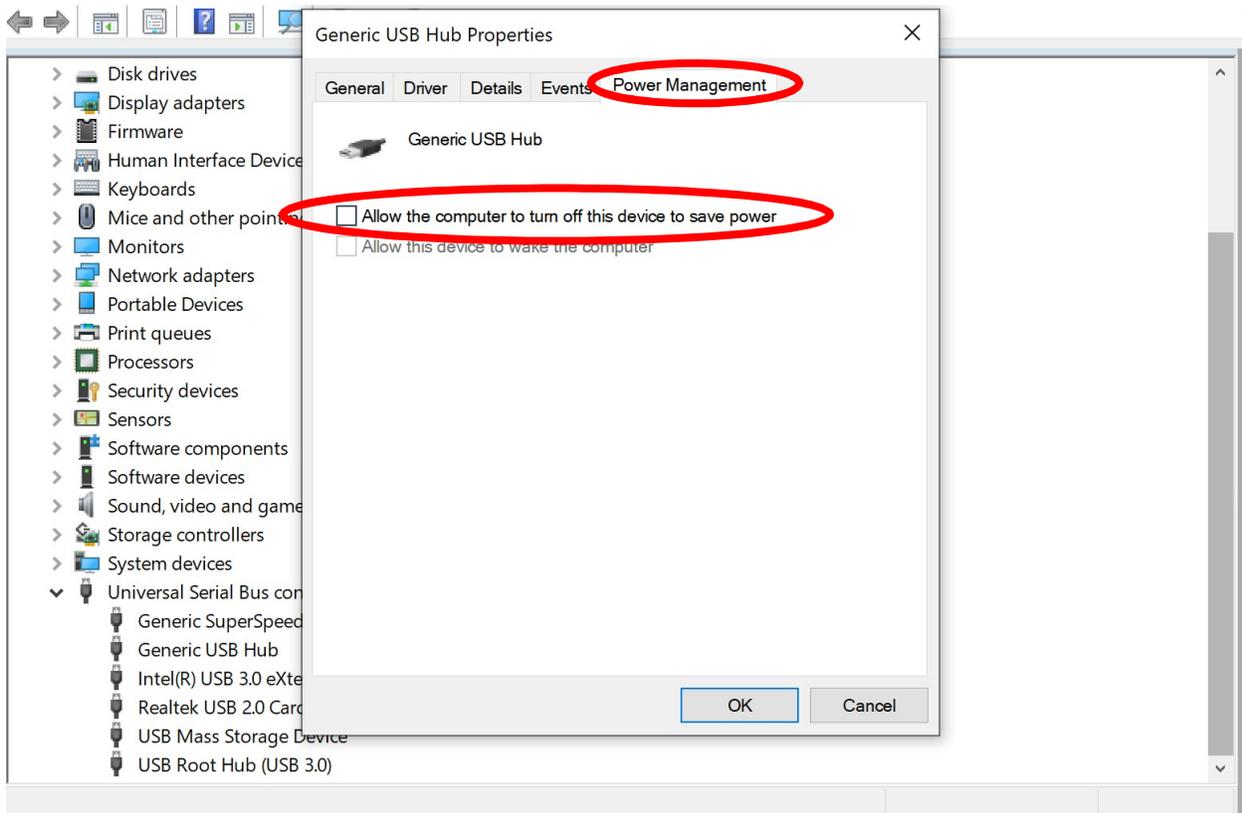

- > Human Interface Devices
- > Keyboards
- > Mice and other pointing devices
- > Monitors
- > Network adapters
- > Portable Devices
- > Print queues
- > Processors
- > Security devices
- > Sensors
- > Software components
- > Software devices
- > Sound, video and game controllers
- > Storage controllers
- > System devices
- ▼ Universal Serial Bus controllers
  - Generic SuperSpeed USB Hub
  - Generic USB Hub
  - Intel(R) USB 3.0 eXtensible Host Controller - 1.0 (Microsoft)
  - Realtek USB 2.0 Card Reader
  - USB Mass Storage Device
  - USB Root Hub (USB 3.0)

8. Right Click on the USB2.0 and USB3.0 and Select **Properties**:

8. Right Click on the USB2.0 and USB3.0 and Select Property and Uncheck on Power Management.

9. Select the **Power Management** and **Uncheck on Allow the computer to turn off this device to save power**:

10. If your computer do not have the USB2.0 drive, then you need to download the appropriate drive and install it on your device, then repeats Step #6-9

**Note: You may need to connect the board (power and USB) with your computer and reboot the computer to let recognize the PIC Trainer board to run the PICKit2 programming software.**
